#### INTRODUCTION 1.

#### 1.1 **Background**

The West Kowloon Cultural District (WKCD) is a world-class integrated arts, cultural, entertainment and commercial district. The Integrated Basement (IB) and Underground Road (UR) in Zone 2A, 2B and 2C are part of the WKCD project.

The whole IB/UR are divided into zones to facilitate development as per the consultancy brief intention. Figures 1.1 show the extent of Zone 2 of WKCD development.

The IB within Zone 2A, 2B and 2C consists of three levels of basement: B1/F, B2M/F and B2/F, while the UR solely refers to the carriageway at B1/F including associated pavement, means of escape (MoE), means of access (MoA) and plant rooms serving the UR only.

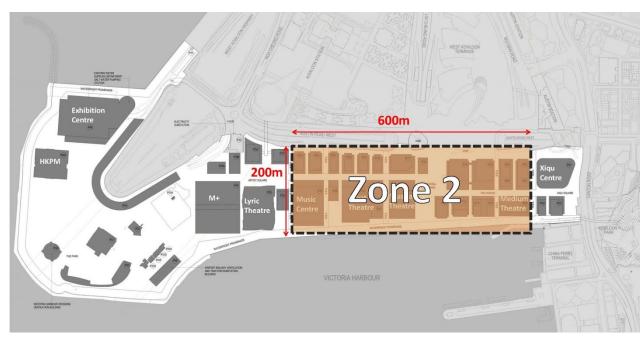

Figure 1.1 Overall Site Plan for Zone 2 (Zone 2A, 2B and 2C)

#### 1.2 **Submission of Tree and Turf Grass Planting and Landscape Plan**

The EIA report as exhibited under Section 7(1) of the EIA Ordinance is approved by the Director of Environmental Protection with the following condition:

The Applicant shall submit tree and turf grass planting and landscape plans as well as a post-planting care plan, in consultation with the relevant authorities, including but not limited to the Planning Department, to the Director of Environmental Protection for approval before commencement of construction of the project. The tree planting plan

shall set out details of the composition of the native tree species to be planted in the project site. The turf grass planting plan shall also set out details of the percentage of grass coverage with justifications and the grass species to be planted. Carpet Grass of the Axonopus genus including Axonopus compressus shall be avoided. The Applicant shall engage a certified arborist to advise on, monitor and ensure proper implementation of the tree and turf grass planting and landscape plans.

#### LANDSCPAE PLAN 2.

Please refer to Appendix A for the Landscape Plan for Zone 2A, 2B and 2C for detail.

#### 3. TREE PLANTING

#### 3.1 **Native Species**

Total no. of proposed trees within Zone 2A, 2B & 2C is 286 nos. Among, no. of proposed native species trees is 135 nos., which is approximately 47% of overall proposed trees species.

Please refer to Appendix B Tree Planting Plan for detail.

#### **TURF GRASS PLANTING** 4.

#### 4.1 **Percentage of Grass Coverage**

According to the Condition of Approval under Section 8(3) of the EIA Ordinance for the Approved Environmental Impact Assessment (EIA) Report in the Register: AEIAR-178/2013, there is no Carpet Grass of the Axonopus genus including Axonopus compressus proposed within Zone 2A, 2B and 2C.

The proposed grass area is around 1190 m<sup>2</sup> and the percentage of grass coverage within Zone 2A, 2B and 2C is around 16% from the total G/F greenrey (approx. 7450 m<sup>2</sup>) at Primary Zone within Zone 2A, 2B and 2C, and around 1% from the total site area of Zone 2 (approx. 12 ha).

$$\frac{\text{Total Grass Coverage}}{\text{Total G/F Greenery at Primary Zone}} \times 100\% = \frac{\sim 1190 \text{ m}^2}{\sim 7450 \text{ m}^2} \times 100\% = \sim 16\%$$

$$\frac{\text{Total Grass Coverage}}{\text{Total Site Area}} \times 100\% = \frac{\sim 1190 \text{ m}^2}{\sim 120000 \text{ m}^2} \times 100\% = \sim 1\%$$

Hybrid *Bermuda* is proposed as it is resistant to disease and drought tolerant. Also, it is wth less cutting frequency is required for maintainance.

Please refer to Appendix C for the Turf Grass Planting Plan.

## 5. POST PLANTING CARE

## 5.1 Landscape Maintenance Strategy

Maintenance of hard and soft landscape components will be carried out by a qualified Landscape Contractor for at least a period of 12 months after the completion of the construction works. Afterward, they will be managed by the West Kowloon Cultural District Authority, or its service agent. The landscape maintenance is to be carried out to a high standard. General maintenance shall be provided using the following criteria.

## 5.2 **Soft Landscape Areas**

General maintenance will include the following regular operations:-

- Watering,
- Weeding,
- Fertilizing,
- Firming up of plants,
- o Pruning/thinning,
- Securing of protective fencing,
- Lawn cutting,
- Forking over,
- Applying insecticide/ fungicide,
- o Replanting/ replacing of damaged/ dead plants,
- Aeration and
- Mulching.

## 5.3 **Irrigation and Drainage**

All planting areas will be provided with adequate manual water point supplies which are no more than 40m apart from each other. Also, planter drainage will be provided for all the planting areas.

Please refer to Appendix D for the Landscape Maintenance Schedule.

## 6. CERTIFIED ARBORIST

WKCDA would engage a certified arborist to advise on, monitor and ensure proper implementation of the tree and turf grass planting and landscape plans within Zone 2A, 2B and 2C.

Certified Arborist's Name – Siu Ling LO

Certification No. - HK-0638A

Native Tree Species

**C. TURF GRASS PLANTING PLAN** 

Shrub Planting Area Within Zone 2A, 2B & 2C

Grass Planting Area Within Zone 2A, 2B & 2C

Proposed Grass Species - Hybrid *Bermuda* 

Proposed Percentage of Grass Coverage - Approx. 16% of total G/F greenery at Primary Zone

- Approx. 1% of total site area

D. LANDSCAPE MAINTENANCE SCHEDULE

## **Landscape Maintenance Schedule**

### LANDSCAPE MAINTENANCE STRATEGY

Maintenance of hard and soft landscape components will be carried out by a qualified Landscape Contractor for at least a period of 12 months after the completion of the construction works. Afterward, they will be managed by the West Kowloon Cultural District Authority, or its service agent. The landscape maintenance is to be carried out to a high standard. General maintenance shall be provided using the following criteria.

## Soft Landscape Areas

General maintenance will include the following regular operations:-

- o Watering,
- o Weeding,
- o Fertilizing,
- o Firming up of plants,
- o Pruning/thinning,
- o Securing of protective fencing,
- o Lawn cutting,
- o Forking over,
- o Applying insecticide/ fungicide,
- o Replanting/ replacing of damaged/ dead plants,
- o Aeration and
- Mulching.

### Irrigation and Drainage

All planting areas will be provided with adequate manual water point supplies which are no more than 40m apart from each other. Also, planter drainage will be provided for all the planting areas.

#### Note

All maintenance works listed should be carried out by experienced and qualified personnel having suitable training in arboricultural works

Landscape Maintenance Schedule applies on a regular basis under normal circumstances. Events may occur such as inclement weather or change in the planting environment, micro-climate, and/or adjacent constructions which may require additional or ad hoc care. These changes should be monitored by experienced and qualified personnel to determine appropriate adjustments to the Landscape Maintenance Schedule.
